

NABFOUNDATION has acquired 80G certification.

The journey for getting the 80G started with our first getting the 12AA certification by the ITO. Under the Income Tax Act, certain contributions or donations are eligible for a tax deduction under Section 80G and hence entail intense scrutiny by the IT Department before being granted such a certification. This means that as a Foundation we can now reach out to the world with a more aggressive stance. What made it possible was the umbrella of NABARD under which this subsidiary has been established. The belief in the ITO stemmed not just from the one-year report card of NABFOUNDATION but from the sterling work NABARD has have done over nearly four decades.

A BIG Thank you to the ITO for issuing the certification within a record time.

We look forward to developing new and meaningful projects with the support of like-minded individuals and corporates. Come and join this beautiful journey towards creating a better rural India.
